## Abstract of JP 2002202944 (A)

**PROBLEM TO BE SOLVED:** To confirm the attribute information on an object usable for installation to surely recognize whether it is an intended object or not with a small number of operation instructions and to complete the installation processing of the object of an intended device. **SOLUTION:** A specified object is detected from the directory information read from an external memory 11 by a CPU 1, and the detected specified object is listed on a CRT 10 according to tree form. When an instruction for making any device desired to be displayed usable is given, the attribute information on a specified device to be installed is displayed on the CRT 10.
